  - Scaffolder (all classes)
  - Working at Height/ Roof Safety
  - Rescue Training
- ✓ Ferno Medical Equipment
- ✓ Mag Particle Testing
- ✓ Asbestos Removal
- ✓ Equipment Inspection & Registration
- ✓ Gas Detection

# CAPABILITY STATEMENT

Safe Option Solutions provides safety systems, equipment and training to refineries, councils, mining, construction and other industrial sites.

## Overview

We are active in the promotion and supply of a wide variety of equipment and services relating to height safety, confined space, rescue, accredited training, on-site installations, rigging and safety audits and placement of specialist personnel for specific tasks.

We are based in Queensland, Australia, and have grown out of a desire to provide 'solutions' to industrial site issues, not just sell safety products.

We are dedicated to ensuring our Clients receive quality information and service to assist in solving their site safety issues.

Safe Option Solutions offers solutions to site issues by offering diversity in the range of products and services we offer our Clients to meet their specific situations. We are able to provide information on a broad range of products as we are not 'tied' to any one manufacturer. This means that our Customers have access to all of the latest products and systems, whatever their source.

Our focus on providing a broad range of products, and giving our customers the benefit of our experience and great service has allowed Safe Option Solutions to develop a significant and satisfied customer base. We aim to grow further by remaining committed to helping solve our Customers' site safety issues.

Our policy is to adopt a high level of service, while offering our Clients cost effective solutions to their site safety issues.

## Your one-stop Safety Solution Provider
