Safe Option Solutions provides safety training and equipment to refineries, mining, construction and other industrial sites.

We are active in the promotion and supply of a wide variety of height safety, confined space and rescue equipment, accredited training, on-site installations and rigging and safety audits.

We are based in Queensland, and have grown out of a desire to provide 'solutions' to industrial site issues, not just sell safety products.

We are dedicated to ensuring our Customers receive quality information and service to assist in solving their site safety issues.

Safe Option Solutions is able to provide information on a broad range of products as we are not 'tied' to any one manufacturer. This means that our customers have access to all of the latest products and systems, whatever their source.

Our focus on providing a broad range of products, and giving our customers the benefit of our experience and great service has allowed **Safe Option Solutions** to develop a significant and satisfied customer base. We aim to grow further by remaining committed to helping solve our Customers' site safety issues.

Your one-stop Safety Solution Provider
